STATEMENT

The country of origin and/or the product origin of this product as indicated in this document may from time to time be subject to slight changes due to ad hoc decisions at our supplier level or to the fact that the reproduction of this document may not follow on daily basis the adaptations in our database. In the database (SAPRM) the raw material specifications is however always up-to-date and as such is fulfills its function as single source of the truth.

The changes are in most cases extremely trivial and will not influence in any case the formulation of the products in which this ingredient is used, neither the declaration of the finished product.

If the changes informed by our supplier influence the Quality (including Kosher, Halal, GMO, Vegan, Vegetarian, irradiation), food safety or legal status of this ingredient, the changes will be immediate and the impact to the finished product will be executed and clients will be informed.

In cases where the most recent information is required like traceability exercises, CSM is anyway not doing these based on the paperwork, but directly in the database which contains the most recently adjusted available content anyhow.
